Banana Klasik Yandan Direkli Kare Şemsiye

Banana Classic Side Pole Square Umbrella

Ürünün ortasında direğinin olmaması, bu modeli diğer tüm modellerden farklılıyor. Kare şemsiyenin en büyük avantajı ise mekan önü kullanımlarda yada birkaç şemsiye yanyana dizildiğinde gölge alan kayıp olmamasıdır.

The absence of a pole in the middle distinguishes this model from all other models. The greatest advantage of the square umbrella is that there is no loss of shade area when used in front of spaces or when multiple umbrellas are placed side by side.

Quadro Umbrella

Bu modelin en büyük özelliği tek ayak üstünde iki adet yada dört adet şemsiyeyi açabilme. Çiftli açılımlarda ayak iki şemsiyenin arka tarafında kaldığı için çok geniş bir alan sağlamakda. Dörtlü kullanımda ise çok geniş bir alan tek direkden opera edilir ve ayağın kapladığı alan çok minimaldir. Bu model mekan önleri yada farklı alanları tek direkte gölge bırakmanın en makul yoludur.

The standout feature of this model is the ability to open two or four umbrellas on a single leg. With dual openings, as the leg remains at the rear of the two umbrellas, it creates a very spacious area. In the case of four umbrellas, a significantly expansive area is operated from a single pole, occupying minimal space. This model offers the most reasonable way to provide shade using a single pole in front of spaces or various areas.

Çift açılır modeller arasında en fonksiyonel ve tekli kullanımda bile yer işgal etmeyen tasarım bir modeldir. Her iki şemsiye de tek ayak üzerinde birbirinden bağımsız hareket edebilmekte. Güneş geliş açısına göre pozisyon alabilmekte. Güneş geliş açısına göre pozisyon alabilmektedir. Gün sonu iki şemsiyeyi de kapattığınızda bağlı bulunduğ ayak kadar yer işgal eder ve size geniş bir alan bırakır.

Among the dual-opening models, this design stands out as the most functional and space-efficient, even in single usage. Each of the two umbrellas can move independently on a single leg. They can adjust their positions according to the angle of the sun. At the end of the day, when you close both umbrellas, they take up only as much space as the connected leg, leaving you with a spacious area.

- Kumaştaki kirleri düzenli olarak yumuşak bir fırça ile temizleyin.
- Gerektiğinde süngeri, nötr sabun ve maksimum 30° C'de su ile yıkayın. Su ile durulayın.
- Kumaşı her zaman tamamen kurumadan önce toplamadan veya katlamadan önce kurutmaya bırakın.
- Aşındırıcı ürünler kullanmayın.
- Kışın tenteyi bir örtü içinde saklayın.

• EASY CLEANING AND MAINTENANCE

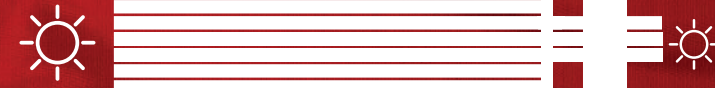

The Saulede Fabric Protector coating on our fabrics creates a barrier effect, strengthening water-repellency and retarding the adherence of dirt. These fabrics require little maintenance: just follow our five basic tips:

- Remove the dirt from the fabric regularly with a soft brush.
- If necessary wash with a sponge, neutral soap and water at a maximum temperature of 30° C. Rinse with water.
- Always let the fabric dry completely before rolling it up or folding it.
- Do not use abrasive products.
- In the winter, store the awning in a cover.

10 yıl sonunda renk haslılığı. Colour fastness after 10 years.
