REUSABLE PRODUCTS

VIŠEKRATNI PROIZVODI

EURO RATAN je trajna adresa za promjenjive trendove, prisutna je već 16 godina. Od 2010. godine naša se tvrtka specijalizirala za prodaju profesionalnih polikarbonatne opreme i polistiren opreme, za posluživanje u ugostiteljstvu, uvijek se fokusirajući na potrebe korisnika. Novoj generaciji Horeca profesionalaca nudimo pionirski i inovativan asortiman proizvoda, potkrijepljen povjerenjem kupaca, lojalnošću i proizvodnim iskustvom iz naše prošlosti. Naša tvrtka uspješno je primijenila polikarbonatni materijal - koji pruža maksimalne ekonomske i sigurnosne prednosti u svojim područjima uporabe, ima dug vijek trajanja, jednostavan je za korištenje i ekološki osviješten te ima visoku otpornost na lom - u njegovom najelegantnijem i estetski najprivlačnijem obliku na stakleno posuđe poput šalica, krigla za pivo, i vrčeva. To nas je dovelo do postizanja vrhunskih rangiranja u preferencijama korisnika, prvo u cijeloj zemlji, a zatim u 52 različite zemlje u koje se ovi proizvodi izvoze. Obzirom da je proizvodnja ovih proizvoda u Turskoj mi kao veleprodaja i distributer bit ćemo bliže našim korisnicima u regiji Europske unije pružajući uslugu na licu mjesta. Naši proizvodi ne samo da se ističu od svojih alternativa svojim umjetničkim izgledom i karakterističnim dizajnom, već nude i jedinu prednost u smislu utjecaja na okoliš i održivosti sa svojom izdržljivom, dugotrajnom polikarbonatnom strukturom. Naša je misija pomoći vam da uživate u ukusima života s povjerenjem u našim čašama i šalicama, koje uvijek odražavaju vaš preferirani stil i eleganciju, a istovremeno doprinose očuvanju čistog i zdravog svijeta za buduće generacije prkoseći vremenu zahvaljujući svom snažnom i izdržljivom polikarbonatnom karakteru.

EURO RATAN is a permanent address for changing trends, it has been present for 16 years. Since 2010, our company has specialized in the sale of professional polycarbonate equipment and polystyrene equipment, for serving in the hospitality industry, always focusing on the needs of the user. We offer the new generation of Horeca professionals a pioneering and innovative product range, backed by customer trust, loyalty and production experience from our past. Our company has successfully applied polycarbonate material - which provides maximum economic and safety advantages in its areas of use, has a long service life, is easy to use and environmentally friendly and has high resistance to breakage - in its most elegant and aesthetically appealing form to glassware such as cups, beer mugs, and jugs. This has led us to achieve top rankings in user preferences, first in the entire country, and then in 52 different countries to which these products are exported. Since the production of these products is in Turkey, we as a wholesaler and distributor will be closer to our users in the European Union region by providing on-site service. Our products not only stand out from their alternatives with their artistic looks and distinctive designs, but also offer a unique advantage in terms of environmental impact and sustainability with their durable, long-lasting polycarbonate structure. Our mission is to help you enjoy the flavors of life with confidence in our glasses and mugs, which always reflect your preferred style and elegance, while contributing to preserving a clean and healthy world for future generations by defying time thanks to their strong and durable polycarbonate character.

Prisma Series

Bezvremenske, ikonske linije... Futuristički dodiri tradicionalnih tekstura. Naša serija Prisma, pomno dizajnirana i izrađena od izdržljivog polikarbonatnog materijala, donosi bezvremenske oblike na vaš stol sa svojim oštrim lomovima koji prenose svjetlost prošlosti u budućnost.

Svojom izdržljivom polikarbonatnom strukturom i elegantnim linijama, naša Prisma serija, koja se sastoji od četrnaest različitih modela, postat će privlačan detalj vaših prezentacija.

Timeless, Iconic Lines.

With futuristic touches on traditional textures, our meticulously designed Prisma Series brings a unique style to durable polycarbonate material. Featuring sharp angles that carry the light of the past into the future, this collection offers timeless forms for your tables.

Comprising 14 elegant models with durable polycarbonate structures, the Prisma Series is poised to be the dazzling detail of your presentations.

IML RECYCABLE
REUSABLE
COST EFFECTIVE
BREAK RESISTANT
IN MOULD LABELING
BPA FREE

S našim IML aplikacijama s punim krugom od 360 stupnjeva, pustite mašti na volju s bojama i uzorcima. Korištenjem In Mold Labeling (IML) tehnologije možete integrirati željene dizajne, logotipe, fotografije ili slogane na cijelu površinu stakla tijekom proizvodnog procesa. A najbolji dio, nema ograničenja u pogledu boje, površine ili veličine teksta. Za tehničke detalje pogledajte stranicu 45 našeg kataloga.

With our full-circle 360-degree IML applications, let your imagination run wild with colors and patterns. Using In Mold Labeling (IML) technology, you can integrate your desired designs, logos, photos, or slogans across the entire surface of the glass during the production process.

And the best part? There are no limitations on color, area, or text size.

For technical details, please refer to page 45 of our catalog.

VAŠE APLIKACIJE

PRINT APPLICATIONS

TAMPONTSKI TISAK

- Aplikacija logotipa/dizajna do 4 boje
- Aplikacija jednostranog i dvostranog tiska
- Maksimalna područja tiska ovisno o veličinama Čaša, Krigla ili šalice
Može varirati u veličini i ići do 50 mm x 80 mm.
- Serijsko, praktično, ekonomično rješenje
- Brza dostava
- Minimalna količina narudžbe 500 komada po artiklu.
- Logo and design application in up to 4 colors.
- Single and double-sided printing options.
- Maximum printing areas may vary depending on the cup size, reaching up to 50 x 80 mm.
- Fast, practical, and economical solution.
- Quick delivery.
- Minimum order quantity: 500 pieces.

SITOTISK

- Mogućnost potpune aplikacije od 360 stupnjeva na šalicu
- Više boja na temelju šest glavnih boja i njihovih nijansi
Primjena tiska perimetra šalice.
- Neograničen tekst i dizajni unutar Veličina
- Minimalna narudžba za tisak punog kruga
Količina je 5000 komada.
- Full 360-degree application on cups.
- Multi-color printing with six main colors and their shades.
- Unlimited text and design size within the cup's circumference area.
- The minimum order quantity is 5.000 pieces for full 360-degree screen printing applications.

IML (Označavanje u kalupu)

- Označavanje cijele površine šalice tehnikom označavanja u kalupu. Savršeni vizualni prikazi od 360 stupnjeva
- PP s unaprijed pripremljenim prilagođenim etiketama kompatibilnim s PP-om. Tijekom proizvodnog procesa šalice, etikete se integriraju i pričvršćuju na šalicu tehnikom aplikacijom. To ih čini perivim i prikladnim za ponovnu upotrebu.
- Naše IML opcije prikladne su samo za naših 5 različitih volumena PP Eco čaša.
- Za IML narudžbe, naše vrijeme proizvodnje je minimalno četiri tjedna, ovisno o količini narudžbe.
- Minimalna količina narudžbe za IML aplikacije je 10.000 komada
- Perfect 360-degree visuals across the entire cup surface using in-mold labeling technology.
- Labels, specially prepared to be compatible with PP, are integrated and fixed onto the PP cup during production, becoming washable and reusable.
- Our IML options are available only for 5 different sizes of PP Eco Cups.
- Production time for IML orders is a minimum of 4 weeks, depending on the order quantity.
- The minimum order quantity for IML applications is 10,000 pieces.

O POLIKARBONATIMA

Željeli bismo s vama podijeliti izvanredne prednosti polikarbonatnog materijala koji koristimo u gotovo svim našim proizvodima.

BEZ PREMCA BROJ 1 U UPORABI U INDUSTRIJSKOM HORECA SEKTORU.

OTPORNOST NA UDARCE Polikarbonatni proizvodi su najtrajniji i najdugovječniji proizvodi koje možete koristiti u HoReca sektoru, koji ima uvijek intenzivnog korištenja. Zahvaljujući svojim vrhunskim svojstvima otpornosti na lomljenje, imaju vijek trajanja otprilike deset puta dulji od drugih plastičnih alternativa i proizvoda od stakla.

UČINKOVITOST PRANJA

Mogu se lako prati u industrijskim i kućanskim perilicama posuđa. Standardne temperature pranja u perilici i korištenje deterdženata priznatih marki neće oštetiti naše proizvode. Na temelju našeg 30-godišnjeg iskustva u industriji, povratnih informacija korisnika i korporativnih postupaka testiranja, možemo s pouzdanjem reći da naši proizvodi imaju prosječni vijek trajanja perilice posuđa do 1500 pranja u normalnim uvjetima korištenja.

OTPORNOST NA TOPLOTU

Polikarbonatni materijal ima puno superiorniju temperaturnu otpornost u usporedbi s drugim alternativnim plastikama. Može se bez problema koristiti na temperaturama između +120°C i -40°C.

FIZIČKE I KEMIJSKE PREDNOSTI

Polikarbonat je visoko propustan i izuzetno proziran materijal. Gotovo ga je nemoguće razlikovati od staklenih proizvoda po izgledu. Svojim vrhunskim izolacijskim svojstvima minimizira prijenos topline iz tekućina unutra, održavajući vaša pića hladnima dulje od stakla, metala i jednokratne plastike. Može se koristiti s gaziranim i alkoholnim pićima bez ikakvih deformacija. Međutim, pića koja sadrže **Anis** brzo će razgraditi polikarbonat, čineći ga neupotrebljivim. **Ne poslužujte u polikarbonatnim čašama pića s okusom Anisa.**

SIGURNOST PRI UPORABI

Primarni razlog korištenja polikarbonatnih čaša je taj što su najsigurnije rješenje u područjima gdje korištenje staklenih čaša predstavlja rizik za sigurnost korisnika. Posebno su učinkovite u bazenima i na plažama hotelskih odmarališta, sprječavajući nesreće i ozljede uzrokovane razbijenim staklom. Također se mogu sigurno koristiti na zabavama i festivalima, na stadionima i sportskim događajima, na jahtama i brodovima, u školama i u staračkim domovima.

UTJECAJ NA OKOLIŠ I EKONOMSKE PREDNOSTI

U današnjim potrošačkim društvima, stvaranje održivih proizvoda i usluga korištenjem resursa na najkorisniji i najekonomičniji način zajednička je odgovornost svih pojedinaca i organizacija. Rubikap se u tom pogledu ponosi prednostima i sviješću koju je stvorio svojim dugotrajnim polikarbonatnim čašama tijekom svog 30-godišnjeg proizvodnog puta. Polikarbonatni materijal koji koristimo u našim proizvodima ima prosječnu stopu korištenja od 1/6 u usporedbi sa staklenim proizvodima. Ukratko, jedna PC čaša znači da se tijekom njezina vijeka trajanja može koristiti šest staklenih čaša, a emisije ugljika nastale u proizvodnji stakla, koja zahtijeva vrlo visoku potrošnju energije, bit će preko 80% onih nastalih u proizvodnji polikarbonatnih čaša. U usporedbi s proizvodima za jednokratnu upotrebu, čaša od 50g.Umjesto korištenja jednokratne čaše od 10 g, korištenje polikarbonatne čaše od 10 g. generirat će 15 kg plastičnog otpada tijekom svog vijeka trajanja umjesto 50 g. Na primjer, tvrtka koja posluje sa 100 polikarbonatnih čaša generirat će 5 kg otpada na kraju svog vijeka trajanja, dok će pokušaj da se isto učini s jednokratnim čašama generirati 1,5 tona plastičnog otpada. S ekonomske perspektive, sljedeća usporedba troškova je jasno vidljiva:

- 1 komad šalice 0,60 EUR = 6 staklenih šalica x 1,10 EUR ukupno 6,60 EUR
- 1 komad šalice EUR =1500 jednokratnih šalica x 0,025 EUR ukupno 37,50 EUR

UPOZORENJE! **Anis** se nikako ne smije koristiti pri posluživanju rakija, ouza, pastisa i sličnih pića koja sadrže **Anis**, jer će uzrokovati zamućivanje i oštećenje polikarbonatnih proizvoda. Posluživanje u polikarbonatnim čašama može se koristiti sa svim ostalim alkoholnim i bezalkoholnim pićima, kao i kavama i čajevima.

ABOUT POLYCARBONATE

We would like to share the key advantageous features of the polycarbonate material we use in nearly all our products.

UNRIVALED IN THE INDUSTRIAL HORECA SECTOR

IMPACT RESISTANCE

Polycarbonate products are the most durable and long-lasting items you can use in the Horeca sector, known for its intensive use environments. With superior shatterproof properties, they last nearly ten times longer than other plastic alternatives or glass products.

WASHING PERFORMANCE

Polycarbonate products can be easily washed in both industrial and household dishwashers. Standard washing temperatures and widely accepted branded detergents do not harm our products. Based on 30 years of industry experience, user feedback, and corporate testing procedures, we can confidently state that our products have a washing lifespan of up to 1,500 washes under normal usage conditions.

HEAT RESISTANCE

Compared to other plastic alternatives, polycarbonate material has far superior heat resistance. It can be used seamlessly at temperatures ranging from +120°C to -40°C.

PHYSICAL AND CHEMICAL ADVANTAGES

Polycarbonate is a highly transparent material with excellent light transmission, making it almost indistinguishable from glass products in appearance. Thanks to its superior insulation properties, it minimizes temperature transfer, keeping beverages cooler for longer compared to glass, metal, or disposable plastics.It is safe to use with carbonated and high-alcohol beverages without deforming. However, beverages containing anise can rapidly degrade polycarbonate, rendering it unusable. Do not use with anise-based drinks.

USER SAFETY

Polycarbonate glasses are primarily preferred in areas where glass poses safety risks for users. For example:

- Pool and beach areas of resort hotels
- Parties and festivals
- Stadiums and sports events
- Yachts and boats
- Schools and elderly care facilities

They help prevent accidents and injuries caused by broken glass in these environments.

ENVIRONMENTAL IMPACT AND ECONOMIC ADVANTAGES

In today's consumer-driven societies, efficiently and sustainably utilizing resources is a shared responsibility for all individuals and organizations.

Rubikap takes pride in its 30 years of production expertise, contributing to sustainability with its long-lasting polycarbonate glasses.

Compared to glass products, polycarbonate glasses have an average lifespan ratio of 1:6. This means that the lifespan of **1 PC glass** equals the use of **6 glass items**, significantly reducing carbon emissions associated with energy-intensive glass production. In comparison to disposable items, a **50g polycarbonate glass** replaces approximately **15kg of plastic waste** over its lifetime, compared to using **10g disposable cups**.

For example: An operation with 100 polycarbonate glasses generates **5kg of waste** at the end of their lifecycle, while attempting the same with disposable products would result in **1.5 tons of plastic waste**.

From an economic perspective, the cost comparison is clear:

- 1 PC Glass 0,60 USD = 6 PC Glass Cup x 1,10 USD **Total Cost** 6,60 USD
- 1 PC Glass 0,60 USD = 1500 PC Disposable Cups x 0,025 USD **Total Cost** 37,50 USD

WARNING! Anise degrades polycarbonate products, so do not use them for serving Raki, Ouzo, Pastis, or similar anise-based drinks. They are compatible with all other alcoholic and non-alcoholic beverages.

ALTERNATIVNI PLASTIČNI MATERIJALI/ ALTERNATIVE PLASTIC MATERIALS

Kako bismo zadovoljili potrebe korisnika, naša tvrtka može proizvoditi i proizvode po narudžbi od različitih plastičnih sirovina. Tablica u nastavku prikazuje alternativne plastične materijale koje koristimo i njihova usporedna svojstva i kvalitete označene sa PC, ili PS, ili PP, ili SAN:

Our company offers custom manufacturing capabilities using various plastic raw materials, tailored to customer needs. Below is a list of alternative plastic materials we use, along with a table of comparative characteristics, marked with: PC, or PS, or PP, or SAN:

DRUGI ALTERNATIVNI PLASTIČNI MATERIJALI	PC	PS	PP	SAN	TRITAN
BISTRINA CLARITY	Izvrсно / Excellent	Izvrсно / Excellent	Mutno / Blurred	Izvrсно / Excellent	Izvrсно / Excellent
OTPORNOST NA PUCANJE BREAK RESISTANCE	Izvrсно / Excellent	Slabo / Poor	Otporan / Resistant	Otporan / Resistant	Izvrсно / Excellent

wastespresso ODRŽIVOST

Wastespresso je inovativna inicijativa koja razvija održive proizvode pretvaranjem taloga kave u bioplastične sirovine. Rubikap je u ovoj inicijativi i investitor i provoditelj. U svojim početnim fazama, naša inicijativa brzo je reciklirala 380 tona taloga kave, sprječavajući korištenje te količine plastike. Ovisno o vašim potrebama, možemo proizvoditi i naše proizvode koristeći Wastespresso i slične održive sirovine.

SUSTAINABILITY WITH wastespresso

Wastespresso is an innovative initiative that transforms coffee grounds into bioplastic raw materials to develop sustainable products. Rubikap is both an investor and implementer of this initiative. In its early stages, our initiative has already repurposed 380 tons of coffee grounds, preventing an equivalent amount of plastic usage. Upon request, we can manufacture our products using Wastespresso and similar sustainable raw materials.
